Projects

Project 1: Project-X (Bridging Generations in Project Selection)

- Developed a full-stack web application, 'Project-X', using **HTML, CSS, JS, PHP, and MySQL**.
- The platform categorizes projects into Minor, Major, and Introductory levels.
- Helps juniors in selecting the right technology for their project category.

Project 2: Decentralized Identity System

- Built a blockchain-based system using **Solidity, Ether.js, React.js, and Pinata API** to decentralize file storage on the IPFS network.
- Implemented smart contracts to store file hash IDs and generate block hashes, ensuring decentralized file tracking within the blockchain.
- Integrated **MetaMask** extension for user authentication with private keys from **Hardhat**.

Academic and Extracurricular Achievements

- Participated in a Poster Presentation competition on National Science Day, with the topic: "Web 3.0."
- Selected for the Technical Department of QWERTY.I/O, the college's tech club, during the second year of engineering.
